INDEX TO VOLUME VII.

A

Ancient Astronomy, G. Simpson, 254.

Ancient Superstitions Regarding Meteorites and Shooting Stars, Harry J. Lane, 121.

Annual Meeting and Reports from the Centres, *J. R. C.*, 38.

Appointment to the Dominion Observatory, C. A. C., 312.

Astronomical and Astrophysical Society of America, *C. A. Chant*, 31.

Astronomical Notes, 67, 135, 267, 303, 377, 468.

Astronomical Work of Olaus Roemer, The, *G. Van Biesbroeck*, 342.

Astronomical Yard-Stick, The, A. A. Hibner, 251.

B

Ball, Sir Robert, Death of, 474.

Before Copernicus, J. L. E. Dreyer, 305.

Boundary Survey Between Canada and the United States, East of the St. Lawrence River, The, *Thos. Fawcett*, 323.

Brashear, John A., A Visit to the Home of Dr. Thomas Dick, 19.

C

Celestial Photography, Professor Frank Schlesinger, 249.

Chant, C. A., An Extraordinary Meteoric Display, 145; Astronomical and Astrophysical Society of America, 31; Further Information Regarding the Meteoric Display of February 9, 1913, 438; Notes and Queries, 70, 140, 269, 311, 381, 474.

Classification of Stellar Spectra, 377.

Clock Synchronization, New Form of, *R. Meldrum Stewart*, 287.

Cluster Variable RR Lyræ, The, C. C. Kiess, 379.

Collier, H. B., Meteorites, 313.

Copernicus, *Albert D. Watson*, 35.

Correction to Note on Comets, 78.

Cosmic Cloud of Calcium, Zaccheus Daniel, 138.

Creation of Matter, The, M. H. de Varigny, 67.

Cumulus Cloud Disturbances, W. Marriott, 307.

D

Dark Stars: The Astronomy of the Invisible, C. A. Chant, 123.

Darwin, Sir George Howard, 114.

DeLury, A. T., Sir George Howard Darwin, 114.

Denning, W. F., Notes on the Great Meteoric Stream of 1913, February 9th, 404.

Dick, A Visit to the Home of Dr. Thomas, *John A. Brashear*, 19.

Distribution of the Stars, H. Seeliger, 68.

Distribution of Stars, T. J. J. See, 69.

Distribution of Stars with Peculiar Spectra, The Milky Way, *T. E. Espin*, 79.

Distribution of the Spectroscopic Binary Stars, R. G. Aitken, 138.

Dominion Observatory, Notes from the, 292, 458.

Dynamics of a Globular Stellar System, A. S. Eddington, 472.

E

Earthquake Records at Toronto and Victoria, B.C., *J. Young*, 64, 132, 264, 300, 374, 466.

Eclipse of a Star by One of Jupiter's Moons, 135.

Energy of the Rotating Earth, The, J. A. Fleming, 267.

Epicentres, Location of, *Otto Klotz*, 229.

Espin, T. E., Milky Way, and the Distribution of Stars of Peculiar Spectra, 79.

Experiences in Alaska, Peter Trout, 250.

Explosion of Worlds, The, Hudson Maxim, 137.

Extent and Mass of the Universe, R. T. A. Innes, 303.

Extraordinary Meteoric Display, An, *C. A. Chant*, 145.

F

Fawcett, Thomas, Boundary Survey Between Canada and United States, East of the St. Lawrence River, The, 323.

Eclipse of a Star by One of Jupiter's Moons, 135.

Energy of the Rotating Earth, The, J. A. Fleming, 267.

Epicentres, Location of, *Otto Klotz*, 229.

Espin, T. E., Milky Way, and the Distribution of Stars of Peculiar Spectra, 79.

Experiences in Alaska, Peter Trout, 250.

Explosion of Worlds, The, Hudson Maxim, 137.

Extent and Mass of the Universe, R. T. A. Innes, 303.

Extraordinary Meteoric Display, An, *C. A. Chant*, 145.

F

Fawcett, Thomas, Boundary Survey Between Canada and United States, East of the St. Lawrence River, The, 323.

Further Information Regarding the Meteoric Display of February 9, 1913, *C. A. Chant*, 438.

G

Gain of Definition by Moving a Telescope, 267.

Galileo, *Albert D. Watson*, 340.

Great Meteoric Display, 77.

Great Reflector for Canada, *J. S. Plaskett*, 448.

H

Halley's Comet as Seen in Tropical Africa, 141.

Harper, W. E., The Orbit of 88*i* Tauri, 242.

Henri Poincaré, His Scientific Work and Philosophy, Charles Nordmann, 377.

Honors for Canadian Astronomers, 311.

I

Is Zero Magnitude High or Low? 388.

J

Jupiter in a Three-Inch Telescope, 381.

Jupiter's Satellites, 305.

K

Kelvin, Lord, Sir J. Larmor, 307.

King, W. F., The New Reflecting Telescope of the Dominion Observatory, 216.

Klotz, Otto, Location of Epicentres for 1912, 229; The Undagraph, 414.

Knowledge, The Limits of, *A. McGill*, 95.

L

Leader in the Progress of Astronomy, Dorothy Bach, 469.

Least Squares, Fundamental Principle of, *R. Meldrum Stewart*, 359; A Theorem in, 363.

León, L., Death of, 272.

Life in the Other Worlds, Henry Westoby, 122.

Limits of Knowledge, The, *A. McGill* 95.

Location of Epicentres for 1912, *Otto Klotz*, 229.

M

Magnetic Observations at Agincourt, *R. F. S.*, 66, 134 266, 376, 465.

Magnetic Observations at Ottawa, *O. K.*, 292.

McKready, Kelvin, Death of, 388.

Meaning of a Change of Two Inches in the Barometer, The, A. F. Miller, 74.

Meetings of the Society, At Toronto, 38, 120, 248, 456; At Ottawa, 48; At Hamilton, 50, 122, 251; At Peterborough, 51, 122, 252; At Regina, 54, 254; At Guelph, 123; At Winnipeg, 125, 252.

Meteoric Display of February 9th, 383, 404, 438.

Meteorites, *H. B. Collier*, 313.

Meteors, James Dull, 50.

Meteors in the Bermudas, 310.

Meteor Shower in Arctic Regions, 475.

Modern Methods of Stellar Photometry, C. H. Gingrich, 125.

N

Nebula, H. C. Howard, 127.

Nebulæ with Large Radial Velocities, 471.

New Observatory at Los Angeles, 130.

New Prism for Spectrograph I., A, *J. S. P.*, 458.

Newcomb, Simon,—His Life and Work, *J. A. Paterson*, 389

Note on a Low Barometric Pressure, W. E. Harper, 72.

Notes and Queries, 70, 140, 269, 311, 381, 474.

Notes from the Dominion Observatory, 292, 458.

Notes from the Meteorological Service, 61, 129, 261, 297, 371, 461.

Notes on the Great Meteoric Stream of 1913, February 9th, *W. F. Denning*, 404.

O

Observation of the Shadow of a Satellite of Jupiter, 310.

One Hundred Inch Reflector at Mount Wilson, 77.

Orbit of 88*i* Tauri, W. E. Harper, 242.

Origin of Climatic Changes, The, 468.

P

Parallax Investigations, 69.

Parallax of the Andromeda Nebula, A. C. D. Crommelin, 309.

Partial Eclipse of the Sun, April 6, 1913, 142.

Paterson, John A., Simon Newcomb—His Life and Work, 389.

Pickering, Wm. H., A Simple Method of Determining the Time, 273

Pivot Errors, Expression by a Formula, *R. M. Stewart*, 283.

Plaskett, J. S., A Great Reflector for Canada, 448; The Solar Union, 420.

Pleiades, New View on the, 142.

Present Condition of Some of the Temporary Stars, Professor E. E. Barnard, 384.

Problems, Two Old Unsolved, *Arthur R. Turner*, 276.

Properties and Constitution of the Atoms, The, Sir J. J. Thomson, 97.

R

Radial Motion of Sun-Spots, Charles E. St. John, 268, 470.

Recent Determinations of Stellar Distances and Motions, J. R. Collins, 48.

Recent Trip to the Hudson Bay District and the Magnetic Observations in that District, W. E. Jackson, 120.

Reflecting Telescope of Dominion Observatory, *W. F. King*, 216.

Reflector, Great, for Canada, *J. S. Plaskett*, 448.

Remarkable Barometric Change, 72.

Report from the Lunar Section, 470.

Report of the Weather in Canada, *R. F. S.*, 61, 129, 261, 297, 371, 401.

Roemer, Astronomical Work of, *G. Van Biesbroeck*, 342.

S

Saved by a Shadow, *William F. Rigge*, 88.

Shadows, Wm. Trant, 255.

Simon Newcomb—His Life and Work, *John A. Paterson*, 389.

Solar and Stellar Photospheres, A. Fowler, 139.

Solar Union, The, *J. S. Plaskett*, 420.

Spiral Nebulæ, Professor P. Puiseux, 378.

Stars, An Excellent Guide to, 141.

Stellar Evolution, 381.

Storms, Norman MacMurchy, 55.

Stewart, L. B., The Structure of the Universe, 1.

Stewart, R. Meldrum, A New Form of Clock Synchronization, 287; A Theorem in Least Squares, 363; The Expression of Pivot Errors by a Formula, 283; The Fundamental Principle of Least Squares, 359.

Sun as a Variable Star, The, C. A. Chant, 47.

Sun Power on the Nile, 304.

Swift, Lewis, Death of, 75.

T

Theorem in Least Squares, A, *R. M. Stewart*, 363.

Time, Simple Method of Determining, *William H. Pickering*, 273.

Turner, Arthur B., Two Old Unsolved Problems of Astronomy, 276.

U

Undagraph, The, *Otto Klotz*, 414.

Universe, The Structure of the, *L. B. Stewart*, 1.

V

Van Biesbroeck, G., The Astronomical Work of Olaus Roemer, 342.

W

Watson, Albert D., Copernicus, 35; Galileo, 340.

Weather in Canada, *R. F. S.*, 61, 129, 261, 297, 371, 401.

Weir, Robert, Time, 57.

Winds of the World, The, Professor G. H. Ling, 58.

Work at the Dominion Observatory at Ottawa, R. M. Stewart, 248.

Y

Young, J., Earthquake Records at Toronto and Victoria, B. C., 64, 132, 264, 300, 374, 466.
